

SA

CEILING DIFFUSERS

*Lowered Face - Fixed or Adjustable
S Series*

STEEL

All S series diffusers feature a sturdy backpan with an integral round collar and a removable center core that contains multiple concentric deflector rings. The SN and SA series diffusers both provide a distinct 4-way horizontal ceiling pattern, which is effective for cooling applications. The SA can also be adjusted to provide a true vertical down throw air pattern for heating and spot cooling applications.

S series diffusers are an excellent choice for applications requiring an economical square face/round neck lowered diffuser with exceptional performance. The unique back panel eliminates the need for square-to-round transitions, resulting in a lower installed cost.

FEATURES

- Full face regardless of neck size
- Removable center core that features multiple concentric deflector rings
- All steel construction
- Available in 12x12 or 24x24 module size, and Lay-in T-Bar or surface mount margin styles
- The SN series diffuser features a flush face with a removable center core
- The SA series diffuser center core is removable and adjustable to provide either a conventional horizontal ceiling pattern for cooling applications or a true vertical down throw pattern for heating and spot cooling
- Standard finish is white (WH)

ACCESSORIES

- Easy-to-install butterfly neck damper
- Steel plaster frame (SMF)
- Aluminum plaster frame (TRM147)

Note: Trim frames and dampers are ordered separately and shipped loose for field installation.
