

PERFORATED DIFFUSERS

Return Panels PTL, APTL Series

PTL

STEEL

ALUMINUM

Models PTL (steel), APTL (aluminum) perforated T-Bar ceiling panels can be used for return or exhaust applications. Typically used in open air return applications where no duct is required. Matches the perforated series supply diffusers.

Optional MIB (Molded Insulated Backpan) & Pattern Deflectors

FEATURES

- PTL panel has a nominal 9/16" turn back to ensure the panel lays flat on the T-Bar grid
- Steel construction is standard. Optional aluminum construction is available
- Standard finish is white (WH)
- Perforated face has 3/16" diameter holes on 1/4" staggered centers and no less than 51% free area

PTL, APTL Available Sizes
