

Johnson Controls ZEC Smart Equipment

Simple Control Solution

Tuttle & Bailey® now offers a simple VAV controls solution to fit your needs. Our ZEC controls, powered by Johnson Controls, offers a multiple features to ensure occupant comfort. Our zone controllers run a pre-engineered HVAC zoning sequence and provides the inputs and outputs that the VAV application requires.

Paired with our ZEC controllers, our NS8000 series network sensors are designed to fit your room sensing demands. These models include a touch display to view zone temperature, RH, CO2, and adjust the zone temperature setpoint. On display models, the user can also choose between degrees Fahrenheit and degrees Celsius. Our sensors can be surface-mounted or vertical wallbox mounted to meet requirements of the specific application.
