

ACCESSORIES

Cable Operated Opposed Blade Damper CAOBD

The aluminum, cable operated opposed damper is ideal for branch duct applications that are located in inaccessible ceilings or remote locations. The cable operator assembly allows easy volume control by adjusting gang operated blades to the desired position.

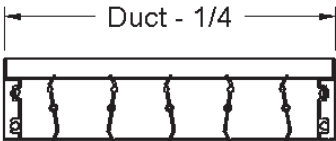

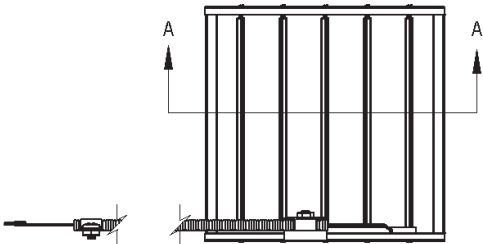

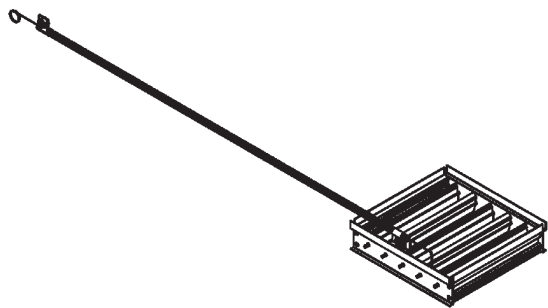

FEATURES

- Aluminum extrusion with some steel components
- Flexible cable operator lengths available from 2' to 10'
- Duct mount only
- Sizes over 24x24 will be made in multiple sections
- Standard finish is mill (ML)
