GENERAL DESCRIPTION

- Model A2300A includes adjustable vanes which vary the discharge pattern between horizontal and vertical.
 - Delivers supply air in a true 360° pattern. Designed to protect ceiling from streaking and smudging.
 - Excellent for variable volume systems. The uniform, nearly horizontal jet maintains effective room air distribution even when
- air volume varies over a considerable range.

 - The A2300A consists of 3 concentric cones in all sizes. This uniformity of design enhances appearance in installations where more than one size is involved.
 - Screwdriver adjustment of the optional damper is achieved without removing the inner cone. (See Note 2, page 2.)
- Quick removal of inner cone with a hex key speeds installation. (See Note 3, page 2.)
 - All cones are die-stamped onepiece construction with smooth, clean surfaces and no corner joints.
 - Material is heavy gauge aluminum with steel bar webbing.
