

**We cannot oversize any filter back grille (i.e. T70DFB or A70DFB)**

**Here is how to calculate the price of an oversized A110 over 48"x48".**

Step 1: Break grille into smaller equal sections and add the price of all the sections together.

Step 2: Divide the price by 0.7.

Step 3: Add a \$100 net set up fee per same sized grille

Note: We can build this grille in one piece up to 72". Anything larger than 72" will come in multiple fully framed sections to be field installed.

**Here is how to calculate the price of all other grilles, excluding the A110 and filter backs. For anything smaller than 96"x96" look in the pricing pages. For anything greater than 96"x96" follow these steps:**

Step 1: Break grille into smaller equal sections and add the price of all the sections together.

Step 2: Divide the price by 0.7.

Step 3: Add a \$100 net set up fee per same sized grille

Note: These grilles will come in multiple fully framed sections to be field installed.

**The lead time for oversized grilles is 6 weeks.**
