

Tensor™

*Laminar flow.
Critical room assurance.*

The Tuttle & Bailey **Tensor™ Laminar Flow Diffuser** exceeds the stringent requirements of clean rooms and critical environments, delivering uniform airflow patterns to cleanse the environment and displace the contaminants.

- Tensor™ is available in three basic styles: the standard model, the subplenum model, and the HEPA filter model
- Available in cold rolled steel, aluminum, and stainless steel (304)
- One-piece perforated flush face
- Stainless steel quarter-turn fasteners for easy removal of face
- Safety cables attached to the backpan and face provide safety for the installer and prevent product damage
- Standard finish is white or mill

 **Tuttle & Bailey.**
